UV flatbed printer	INCA S40i	1600 x 3000mm	Onset S40i is a 4 or 6 channel UV flatbed printer designed to produce over 3500m <sup>2</sup> of print in an 8 hour production period. It is equipped with the latest technology, never before used with UV inkjet, to provide its own onboard artificial intelligence.		Direct print on boards such as, Alu- penl, Card board, FoamePVC, Acrylic.
UV Roll to Roll	JHF 3370	3200mm wide	Specially engineered for printing of high-quality flat and roll-to-roll materials. 600dpi physical resolution, high speed industrial printhead help achieve 1800dpi printing output quality. Capable to print on both soft and rigid materials. Speed up to 120 m <sup>2</sup> /h		Fabric Light box, event graphics, soft signage, vehicle graphics, POP displays, double-sided banners and outdoor signage.
Latex printer	HP LX 850	3200mm wide	The HP Scitex LX850 Industrial Printer is a 3.2 m latex ink printer that delivers maximum versatility and productivity with multiple workflow features. Delivering high image quality with up to 1200 dpi resolution and an embedded spectrophotometer, the printer is designed to produce a wide variety of high-quality sign and display graphics		Event graphics, soft signage, vehicle graphics, POP displays, double-sided banners and outdoor signage.
UV flatbed printer	Teckwin	2000 x 3000mm	A new generation of high precision, high speed flatbed UV printer. By taking advantage of the latest industrial 6pl nozzle printhead, can reach speed up to 150 square meters/hour and printing resolution of 1200dpi. With the application of intelligent on-demand printing control system, contactless transmission, and other new technologies		Direct print on boards such as, Alu- penl, Card board, FoamePVC, Acrylic.
UV flatbed printer	OCE 350GT	1250 x 2500mm	The Océ Arizona 350 GT is the next generation model of the award-winning Océ Arizona printer line, which uses UV curable inks and Océ VariaDotTM imaging technology to deliver nearphotographic image quality on a wide range of rigid or flexible media.		Direct print on boards such as, Alu- penl, Card board, FoamePVC, Acrylic. And roll media such as, Self adhsvie vinyl, gsm poster, banner.
Latex printer	HP 360	1600mm (wide roll)	The HP Latex 360 Printer produces indoor and outdoor prints on a variety of traditional signage substrates. And high-quality, durable prints provide scratch resistance comparable to hard-solvent inks.		Self adhsvie vinyl, gsm poster, banner

# Our Equipment

Equipment	Brand	Size	Feature	Image	Product
UV Printer	Mimaki JV400 -160 SUV	1520mm (wide Roll)	The Mimaki SUV sets new standards by combining the flexibility of solvent printing with the durability of UV cured inks, resulting in instantly dry, smooth, glossy prints, which simulate the appearance of being coated yet retaining the brightness expected from a solvent printer.		Self adhsvie vinyl, gsm poster, banner
Digital Press	Konica Minota C 6501	320 x 1200mm	C 6501 Production color printers from Konica Minolta are the total solution for high-quality, costefficient digital color production -- with high-speed output, spectacular image quality and powerful.		Booklet, flyer, banner (gsm stock)
Flatbed cutter	Aoke DZ77	1600 x 2500mm	The new high speed digital router / cutter machines provide fast and flexible solutions to short run production requirements. Automating your finishing department increases productivity and reduces bottlenecks.		Cut ridge substate. Sampling and small prodction for packing and display
Laser Cutter	Argus	1220 x 2440mm	Acrylic Sheet Cutting And Engraving		Acrylic, organic board, bamboo product, paper
Roll-fed Cutter	Summa T160	1600 mm (Wide Roll)	Summa S160 D is powerful drag-knife cutting head. It employs Summa's most powerful servomotors yet and MicroSprocket™ drive to let you cut with amazing speed, confidence and precision. Coupled with an astonishing array of innovations and built-in capabilities		Cut flex media to shape.
